FOR OVER 36 YEARS
**THE MOST TRUSTED
CROSSBOW
ON THE PLANET**

At Excalibur, we aren't big business cashing in on the growth of crossbow hunting. After 36 years of making crossbows, we are still crossbow hunters who build crossbows for hunters. Our aim is to continue to make the most efficient, reliable and accurate hunting crossbows money can buy right here in North America as well as provide unparalleled service to all our customers. All of our products are developed and produced by the toughest, most uncompromising product evaluators in the woods ...US!

Excalibur crossbows are world renowned for rugged reliability. This reputation is primarily due to our Compact Recurve Limb Technology. Excalibur has taken a historical tried-and-true design and perfected it to be stronger, faster, lighter and quieter using modern day components and technology. It's simple – two bombproof limbs and a string. No cams equal no timing or tuning issues. Fewer parts mean less problems.

To prove just how tough Excalibur Crossbows are, we put them through the destruction challenge to see if they would still perform – We drove them over with a truck, we dragged them down a runway, we even dropped them out of a helicopter - the results: perfect bullseyes every time!

TECHNOLOGY THAT MATTERS...

PRO-SHOT TRIGGER

Roller catch frictionless technology that eliminates any friction, adjustable 1 or 2 stage trigger that breaks cleanly and precisely at 3lbs without creep

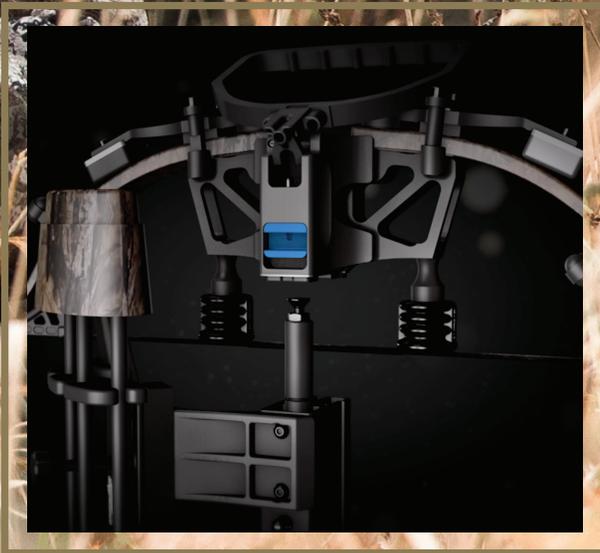

PRO-SHOT **ACP**

CHARGER CRANK SYSTEM

Silently and safely load/unload your crossbow in the field with our ambidextrous internal cranking system. Dramatically reduces felt draw weight to a mere 12 lbs

COMPACT RECURVE TECHNOLOGY

Excalibur crossbows have always been known to be more reliable, more accurate, more powerful, lighter weight and virtually maintenance free. Now thanks to the all new CRT High Output limbs, Excalibur crossbows are capable of producing speeds and kinetic energy that rivals or exceeds any crossbow on the market – Making the new Bulldog 440 one of the fastest crossbows ever produced!

GEN II
Compact **R**ecurve **T**echnology

QUICK LOC TECHNOLOGY

Quick Loc Technology allows our crossbows to be disassembled and reassembled in seconds by a pull of a button with no change in point of impact. All this adds up to a compact, easy to transport and store crossbow that can be ready to shoot in seconds with guaranteed repeatable accuracy.

QUICK LOC
TECHNOLOGY 

ASSASSIN SERIES

Crank up the silence with our new bombproof big-game annihilator. The never out-of-tune, always accurate whitetail reaper. Equipped with our new Charger Cranking System™, the industry's only dead-quiet internal crank aid. The Assassin cranks up the extinction of cams and cables. Exit timing and tuning issues, and enter the reign of absolute reliability, in a platform that's fast, safe and easy to cock and de-cock. Combined with hair-splitting precision and a new two-stage rifle-grade trigger to match. So, crank it up, and step up to the Assassin. Only by Excalibur.

01 CHARGER CRANKING SYSTEM

Crank it up with the revolutionary, dead silent internal crossbow cranking system, eliminating the need to load your crossbow before entering the field in fear of spooking game. The ambidextrous cranking handle can simply be removed and stored on the stock.

02 TRUE-FIT STOCK

Hunters come in all shapes and sizes. With the unique tool-less adjustment feature, the stock can adjust out 3 inches (12" - 15" length of pull) and the cheekpiece 2 inches, providing enhanced comfort, stability and accuracy for any shooter.

03 TACT-100 SCOPE

The TACT-100 CROSSBOW SCOPE featuring the New FAST POINT 100 Yard Illuminated Multi Reticle is perfect for target shooting or long range practice so when you shoot at sensible hunting distances, it will give you the confidence to make the shot when it counts.

04 PRO-SHOT TRIGGER

The safest crossbow trigger just got an upgrade with a new frictionless, 2-stage trigger that breaks cleanly and precisely every time, without creep. This produces repeatable, rifle-like accuracy at any distance.

03 THE ASSASSIN SERIES

05 PROFLIGHT ARROWS

Constructed using the highest quality carbon fiber with .001" straightness and +/- 1 grain weight tolerances, the NEW PROFLIGHT ARROWS will ensure repeatable accuracy which is everything for confidence and success.

FAIL-SAFE STRAP

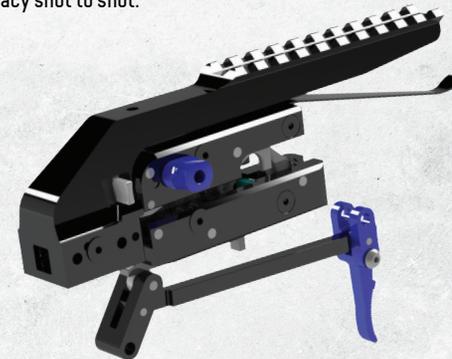

This unique safety strap provides the safest and most effective means of cocking and de-cocking a crossbow.

06

SLIDING CATCH

This unique locking system safely locks the sliding carriage at full draw, eliminating load on the cranking system. In addition, the precision alignment of the Sliding Catch ensures consistent accuracy shot to shot.

05

TAKEDOWN WITH QUICK LOC TECHNOLOGY

Quick Loc Technology allows our crossbows to be disassembled and reassembled in seconds by a pull of a button with no change in point of impact.

INTRODUCING THE ASSASSIN 360

The Assassin 360 was designed for high performance yet had to be the world's easiest, safest, most rugged and reliable crossbow ever produced. The Assassin 360 delivers that and more! It comes loaded with every feature you could want including a tool-less adjustable stock and cheek piece, a match grade 3 lb trigger and the New Charger Cranking System that takes away the difficulty of cocking the recurve limbs. Now hunters can get a high performance crossbow that combines the effortless cocking of a compound with the rugged, reliability of a recurve.

The Assassin is the ultimate combination of stealth, strength and performance. Generating 360 FPS from the world's quietest crossbow is now virtually effortless. Designed around the industry leading Micro platform, the Assassin dominates in tight quarters and in the stand.
