ARCHERY
 LEGENDARY INNOVATION.

2013 PRODUCT CATALOG

Letter from Gregg

Well, with another successful year of bringing you more innovation and improved quality than ever before, at Horton we've found a way to raise the bar again for 2013!

As the oldest crossbow manufacturer in the industry, we know that over 50 years of legendary innovation has been no accident. We also know that we need to continue to bring you leading edge products designed to make your crossbow experience the ultimate in performance and reliability.

This year our goals are no different. We are excited to introduce the Havoc 150; the latest in Reverse Draw Technology (RDT) that we feel is a strong addition to our already robust line up of RDT crossbows.

The Havoc 150 combines the balance and performance of our RDT platform with the ease of shooting that a 150lb crossbow offers. Just try it and we think you will agree the Havoc 150 takes Reverse Draw Technology to the next level in performance and comfort.

As a US based company, we know how important it is to you that our products are made in the USA. As you now know, all of our production activities are now based in Kent, OH. A fact we are very proud of.

We also know that quality has to be our number one priority in 2013. You will see Horton spend more time than ever before to ensure every crossbow we produce meets the highest standards for reliability and performance.... You have my word on it!

The next time you shoot a Horton, know that you're shooting the very best bow on the market. Know that American muscle and ingenuity designed and manufactured that bow, and that all the talented, dedicated people who had a hand in building it share your passion for the outdoors.

From all of us at Horton, here's to your continued enjoyment of the outdoors and your continued success with our products. We truly value you as a member of the Horton family.

Gregg Ritz
CEO

New for 2013

Horton's commitment to excellence and innovation never rests. As a result, we're building on a hugely successful past while looking at the present and planning for a better and brighter future. We're proud to admit Horton is "Made in the USA." Our employees take great satisfaction in providing a world-class product at an affordable price built right here at home. We've matched our state-of-the-art crossbows with some of the most innovative optics, arrows and accessories in the outdoor industry. The result is a Horton package with jaw-dropping form and bad-to-the-bone function any outdoorsman or woman would be proud to own.

The new Horton Havoc 150 is the pesky little brother to the already popular Horton Havoc 175. But don't let the word "little" fool you because like many little brothers it's packing plenty of attitude. It's in the form of the patented Reverse Draw Technology which has set the gold standard in speed, accuracy and performance in this and other popular Horton crossbows. It's got an ergonomically-redesigned stock that fits any shooter for precision balance and spot-on target acquisition. It's fast, too, zipping along at a blazing 305 fps with Horton's new Savage RDT (reverse draw technology) arrow.

The need for speed never slows down and as a result Horton has developed the new Savage RDT (reverse draw technology) arrow for 2013. Specifically designed and engineered for Reverse Draw and other shorter powerstroke crossbows, the 17.5-inch Horton Savage RDT is lighter and faster than traditional crossbow arrows. Its precision construction creates a weight-forward design for optimal Front-of-Center (FOC) technology and deadly downrange accuracy and ultimate knockdown power. Weighing in at only 378 grains (with a 100-grain point) shooters of the Fury, Havoc and Vision can pick up anywhere from 10 to 15 fps, which just might mean the difference between a marginal shot and a great shot.

Speed. Balance. Stealth.

The patented Reverse Draw Technology gives Fury an amazingly compact design, while its CNC-machined riser and lightweight aluminum barrel produce incredible balance and accuracy. Precision CNC-machined cams and advanced laminated limbs optimize speed, integrated stumper arms maximize stealth and Horton's custom Viper X strings deliver incredible speed. Every stylish inch of this radical rig is meticulously designed and assembled in the USA by Horton's dedicated engineers and craftsmen who share your bowhunting passion.

PACKAGE CONTENTS:

- MODEL - CB878
- > HORTON FURY CROSSBOW
- > RDT COCKING SLED
- > 4X32 SCOPE
- > ARACHNID BLK 5-ARROW QUIVER
- > 3 - 20" CARBON ARROWS
- > SLING
- > DE-COCKING ARROW

Broadheads not included.

- CNC machined riser and light weight barrel for balance and accuracy
- Precision CNC machined cams and advanced limbs optimize speed
- Custom fit over-molded interchangeable recoil pads (+/-1/2")
- Viper X string with integrated stumper arms for added stealth

Width (Axle to Axle) - 16 7/8" - Loaded Width (Axle to Axle) - 12"
Weight - 8.10 lbs - Arrow Length - 20"

*PHOTOGRAPHED WITH A SAVAGE ARROW.

Compact. Quiet. Balanced.

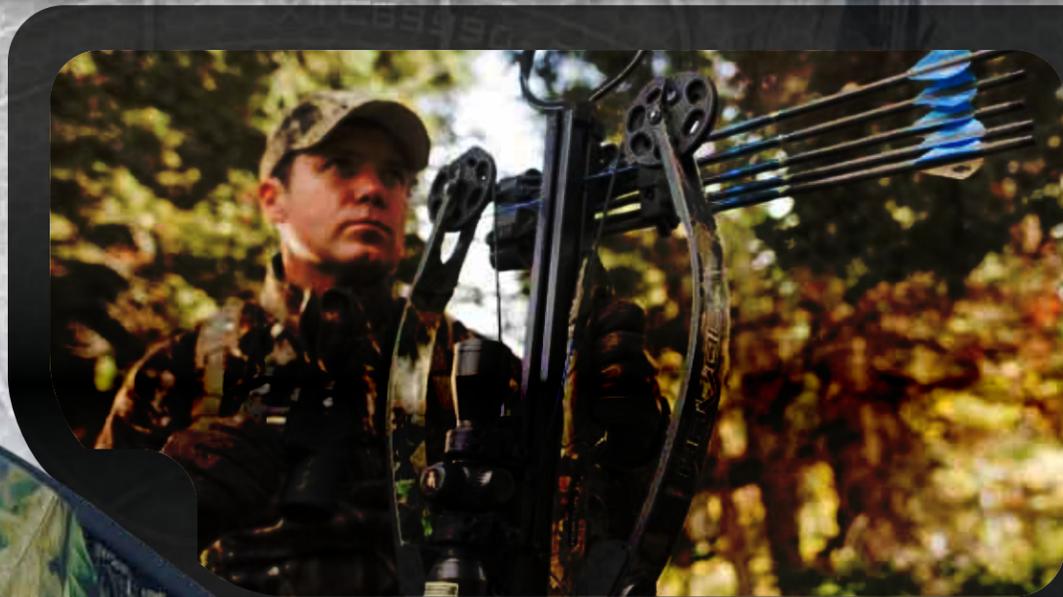

Havoc is powered by the patented Reverse Draw Technology and sports a completely overhauled stock for even greater feel. This impressive rig delivers a best-in-class bundle of features and technologies to fully equip shooters of all levels. A CNC-machined riser yields optimal balance in any shooting position, while high performance CNC-machined aluminum cams create incredible energy storage. Hand-crafted Viper X strings give Havoc enviable speed, while an anti-dry fire mechanism ensures your safety.

SCOUT™

Youth Crossbows. Compact. Safe.

SCOUT 125

Youth hunting bow in a compact easy to handle design. Horton scaled down every critical feature of its adult crossbow to develop the Scout stock to make sure it fits a wide range of youth hunters.

- Ergonomic stock design specifically built for youths
- Durable string and cable systems for optimal speed
- Energy wheel design for easy and consistent cocking
- Precision 25mm Single Dot Sight with Dial-A-Range (Scout)

PACKAGE CONTENTS:

- > SCOUT 125 (CB721); EAGLE (CB830)
- > 25MM SINGLE DOT RED DOT SCOPE (SCOUT)
- > FIBER OPTIC PEEP AND PIN SIGHT (EAGLE)
- > 3 ARROW QUIVER (SCOUT)
- > 3 ARROWS (SCOUT)

Broadheads not included.

EAGLE

Developed as a kids training bow, the Horton Eagle was specifically designed to be used in school and after-school archery programs. At a draw weight of only 25lbs, it is intended for target shooting and not intended to be a hunting tool.

Powerhouse. Durable. Performance.

Bone Crusher 175 HD delivers the total package of speed, pinpoint accuracy, sleek design and rock solid performance. At 325 fps, Bone Crusher is the fastest, most durable, best-built mid-priced bow on the market. And with features like a precision die cast riser, ergonomic thumbhole stock with bullpup trigger design, a custom length of pull with interchangeable over-molded recoil pad, and 55% high let off cams, it's no wonder Bone Crusher has made believers out of serious hunters everywhere.

- 55% High let off cams - Fast and easy to cock
- Aluminum barrel with precision die cast riser
- Ergonomic thumb hole stock with bullpup trigger design

Redefining Arrow Technology

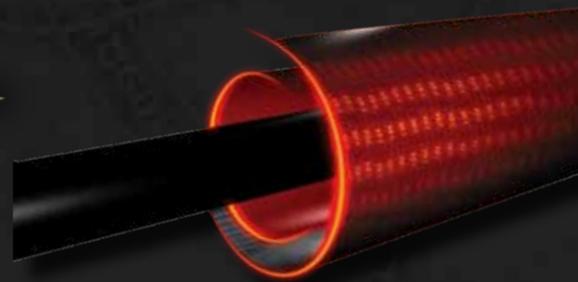

Horton's dedication to quality components to compliment the best-built crossbows in America is critical to our success as well as yours. As a result, we've partnered with the leaders in arrow technology to design our arrows which are built with meticulous attention to every accuracy-boosting detail. Crafted from the highest-quality components which deliver uncompromising results, our arrows are specifically engineered to maximize performance of any crossbow in the Horton family or even a distant relative.

Next to your crossbow, the arrow is the most critical link between a hunter and success. Don't skimp on quality and demand the exacting standards of Horton arrows for your next hunt. They deliver the tightest groups with unmatched accuracy and downrange kinetic energy. All features you'll appreciate when the trophy-of-a-lifetime is standing at 25 yards staring back at you.

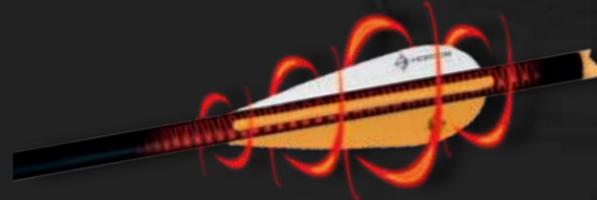

Arrow accuracy and penetration are key components to any successful hunt. The revolutionary Front-of-Center (FOC) technology provides the necessary balance for superior arrow flight while maintaining maximum kinetic energy for downrange knock-down power and penetration. Horton's carbon and aluminum arrows are designed and assembled by our engineers with the finest, system-matched components in the industry. We use only the highest quality shafts, vanes, nocks and inserts available on the market today. Together, they result in an arrow built with the tightest tolerances, straightness and specifications imaginable. In fact, we're so sure our field-ready arrows are the best in the business we guarantee that each pack of arrows will shoot 2-inch groups or tighter at 40 yards!

In addition to our popular Lightning Strike and Bone Collector (carbon or aluminum) and Bone Crusher (carbon) line of arrows available in 20-inch versions, Horton has developed the new carbon Savage RDT (reverse draw technology) arrow. This 17.5-inch beauty was specifically engineered for crossbows like the Horton Fury or Horton Havoc with Reverse Draw Technology, or other crossbows with shorter powerstrokes. Speed kills, with this arrow are no exceptions, resulting in another 10 to 15 fps on many popular Horton crossbow packages.

Premium Grade Carbon

Achieving precision results requires Horton to utilize premium raw materials for their carbon and aluminum arrows. Implementing tight production controls ensures the tightest tolerances in the industry for Horton crossbow arrows.

High Performance Vanes

It doesn't take much to throw your arrow off course. Rotational stability is the key factor in correcting the flight path of an arrow and maintaining kinetic energy for greater accuracy and penetration. Stability of an arrow is driven by the overall profile, weight, material and positioning of a vane on the arrow. This is why Horton engineers utilize premium 3" performance vanes designed to counter these imperfections and achieve optimal rotational stability for greater downrange accuracy.

Savage™ Carbon

Savage RDT carbon crossbow arrow by Horton Archery is designed specifically for Reverse Draw crossbows and other crossbows having a shorter powerstroke. Engineered to offer outstanding strength, durability, and high powered performance while increasing overall arrow speed due to lighter overall weight. Precision construction creates a weight forward design for optimal front of center (FOC) and deadly downrange accuracy with ultimate knockdown power.

Bonecrusher HD™ Carbon

Purpose-built for hardcore performance, Horton Bone Crusher arrows are engineered for one very specific purpose: to deliver industry-leading kinetic energy to take down the toughest big game trophies. Delivering a best-in-class strength-to-weight ratio, Bone Crusher arrows live up to their name with unbeatable knockdown power and unrivaled down-range energy. You simply won't find a stronger, straighter, more dependable big game arrow anywhere. When your hunt calls for an arrow that can quickly and efficiently dispatch the toughest big game, shoot Horton Bone Crusher arrows and dispatch your next trophy with unshakable confidence. (Carbon only.)

DC100 - 22" De-cocking Arrow

Our de-cocking arrow is the only one of its kind on the market, and it fills a very simple yet necessary niche. Featuring a durable shaft and blunt tip for easy recovery from both targets and the ground, it provides a safe, convenient way to de-cock your bow after your hunt. And its bright orange vanes ensure you'll never lose it in the field. It conveniently fits in any quiver and offers yet another example of safety-focused, value-added, common sense Horton design.

Reinforced steel blunt tip

Precision Optics

Topping off your bow with anything less than premium Horton optics is a risky proposition. Our scopes are specifically engineered for today's modern, high-performance crossbows – and are guaranteed to deliver the utmost in accuracy and field-ready function.

Our pioneering Dial-A-Range and Multi-A-Range reticle technologies propelled crossbow scope technology to new standards of design and performance. Building upon these innovations, extensive research, development and testing have led to our most advanced scope lineup ever. Featuring generous eye relief, lightweight yet rock solid housings, simple, user-friendly adjustment, bright, crystal clear, multi-coated lenses for optimal light transmission, and precise MOA adjustment, Horton scopes complement any bow in our lineup – as well as any other crossbow that accepts 7/8" Weaver-style bases.

Our premium 2013 optics are shorter, lighter, brighter, and even more user-friendly – everything you need to get dialed in and the job done. Featuring fully coated glass and guaranteed to be shockproof, waterproof and fog proof, our scopes ensure you'll never miss a shot opportunity due to inferior design.

Just like our bows, Horton scopes and sights stack the odds in your favor – and eliminate excuses. See what you've been missing with premium Horton optics.

4x32 Scope Kit (AC213)

Stack the odds in your favor with rock solid performance from Horton's 4x32 Multi-A-Range Scope Kit. Multi-A-Range technology features five crosshairs for varying yardage at approximately 10-12 yard increments depending on crossbow model. The Multi-A-Range can be used on any crossbow allowing for scope mounting. Specifically designed to withstand reverse recoil from crossbows, it is optically engineered with a 2 1/2" eye relief. Fully coated optics are shockproof, waterproof, and fog proof. Includes 1/4 minute windage and elevation adjustments, duplex reticle and 50-yard parallax. All of this in a compact (10" Length) and lightweight design that offers a FOV of 34ft at 50 yards. Package includes high performance lightweight aerospace aluminum scope rings.

SS120 Multi-A-Range® Scope Mount Kit

- Weaver style scope mounting kit
- Includes two 1" aluminum rings and 7/8" dovetail bracket
- Fits all Horton crossbows and scopes with 1" tubes

SSS094 Cobra® Fiber Optic Sight Pin

- Precision machined all-steel pin
- Brilliant fiber optic green .029" sight pin
- Fits 8/32 thread count

SS099 7/8" Weaver Style Base

- Premium CNC milled aluminum Weaver style base
- Reverse recoil resistance (R3) for crossbows
- Durable matte black finish

SS200 Scope Rings

Rings and Mounts

Get dialed in for tack driving performance with Horton's premium line of scope rings and mounts. Patented ring design features Reverse Recoil Resistance (R3) specifically designed for crossbows and utilizes an advanced locking system for precision accuracy. All rings feature a durable "no-shine" matte black finish and fit on scopes with 1" diameter and 7/8" Weaver style base.

4x32 Mult-A-Range Scopes

For 2013, our new diverse lineup of 4X32 scopes packs legendary Horton quality and craftsmanship into a compact, lightweight, precision crafted package. Featuring consistent 4X magnification, proper 4" constant eye relief, our proven Multi-A-Range Reticle System with integrated Windage Marks, and precise 1/2" MOA click adjustment at 50 yards, our 4X32 scopes are built to last and engineered to deliver industry leading results. Our multi-coated, incredibly clear and bright, shockproof, fog proof, waterproof glass further adds to the list of our 4X32s' value-added, performance-boosting features.

- Multi-A-Range Reticle Design
- Multicoated Optical System
- 4" Constant Eye Relief
- Precise, hand-turn 1/2"-MOA Click Adjustments
- 50-yard Parallax Setting
- Quick Focus Eyepiece
- Compact Size - Only 8.6"
- Windage Marks Calibrated for 10mph Crosswinds
- Waterproof, Fogproof, Shockproof

Variable Power Scopes

Our new line up of Variable Power scopes complement your bow with versatility, proven performance and compact, lightweight design. Featuring the highest quality components and multi-coated, shockproof, fog proof, waterproof glass, our variable Power Scopes get the job done without weighing you down. A great choice for all types of hunting, these precision-engineered optics utilize our renowned, user-friendly Multi-A-Range Reticle System and Vari-Range technology with integrated Power Ring Selector, Windage Marks, and pre-calibrated arrow drop compensator for enhanced accuracy - allowing you to hunt with the utmost confidence in your setup.

Integrated Power Ring Selector with pre-calibrated arrow drop compensator.

- Multi-A-Range Reticle Design
- Multicoated Optical System
- 4" - 3" Eye Relief

Cocking Devices

Our diverse bow lineup offers custom performance for all types of archers – men and women, youth, beginners and veteran shooters alike. Similarly, we make cocking devices to suit all types of shooters.

Our custom cocking devices are designed for optimal safety, quality, and value-added performance. They offer amazingly simple, user-friendly design to ensure that shooters of all ages and skill levels can load and shoot their bows efficiently, safely and effectively.

They offer a safer, easier alternative to hand cocking your bow, and they boost your bow's performance by creating more uniform weight tension and an equalized limb load – ultimately boosting accuracy and overall bow performance.

EZ Crank Cocking Devices

Horton's EZ Crank™ weighs only ounces. The EZ Crank unit can be removed and stored away in seconds after cocking the crossbow, so it is not in the way while hunting. This durable, lightweight unit is constructed of aircraft grade aluminum with a gear reduction that allows the bow to be cocked consistently with minimal effort. Covered by a one-year warranty. Visit the Horton website or call customer service for correct crank model for your bow. * All cranks are right-handed only.

EZCR EZ Loader™ Cocking Rope w/Bridge AC250 Universal Cocking Rope (No Bridge)

- T-Handle design provides solid surface for secure grip
- Lightweight and portable for in-field use
- Fits most Horton crossbow models (excluding Vision)

AC870 RDT Cocking Sled

- Specifically designed for Fury, Havoc and Vision
- Advanced roller system in lightweight design
- Ensures proper limb load for greater accuracy

*EZC9 Crank Kit includes the AC230 Dovetail Adaptor and the AC512 standard Recoil Pad.

Accessories

Horton employees are a unique breed. They live and breathe crossbow technology. Their passion for the hunt is understood only by those like-minded hunting fanatics who shoot Horton bows. When they're not testing and developing products in the R&D lab, they're dressed in camo from head to toe, field testing their latest bow and accessory designs.

Sure, they might not know much about world affairs or the latest fashion trends, but make no mistake: Horton engineers know crossbow technologies and crossbow accessories. Fifty years as the industry leader ensures that your bow – and every Horton accessory you complement it with – will perform with unfailing reliability.

Complement your bow with our extensive line of high-quality, performance-boosting accessories. From lightweight quivers, durable cases, rail lubricants and string wax to padded slings, noise dampeners, tune-up kits and more, we offer everything you need to keep your bow shooting and looking great.

Premium Strings

Tap into an entire new level of speed and consistency with Horton's new premium line of strings specifically designed for Horton Crossbows. Each of the hand crafted strings feature premium 8190 BCY material with a Spectra Halo .030" center serving. The advanced designs are presented in custom crafted candy cane or twist color combinations and pre-stretched to 450lbs of force for ultimate precision.

String Wax and Rail Lube

Tack driving performance from Horton crossbows is easily achieved with the right tools. Horton's rail lubricant and string wax ensure long lasting durability by helping to eliminate string friction and lengthening the life of your string serving. Engineered for today's high performance crossbows, each provide a scent free formulation with a no mess applicator tip for increased speed and accuracy.

AC045 Camo

AC050 Black

Arachnid Quiver

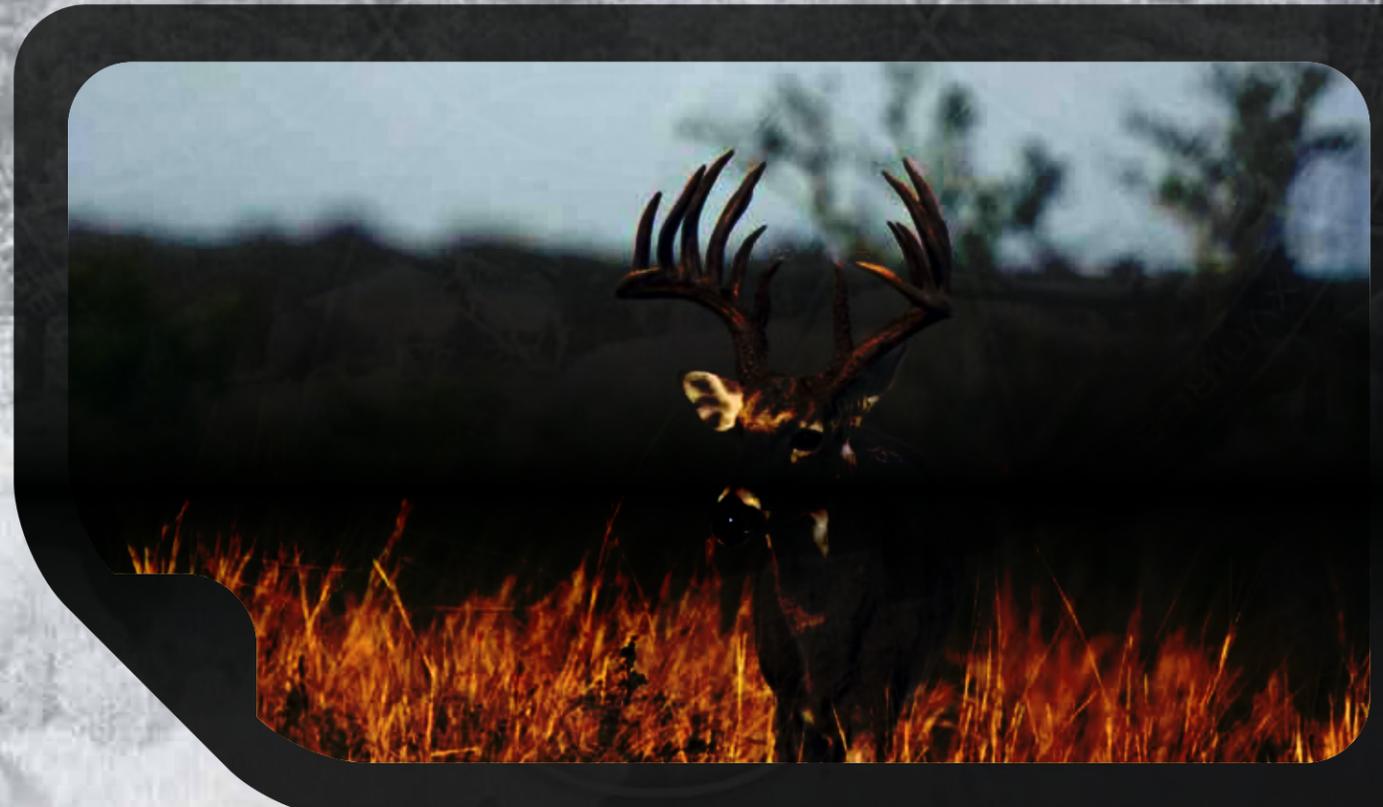

Lightweight quick-detach quiver design in compact profile. Weighing approximately 6 ounces and featuring five dual receivers hold crossbow bolts/arrows securely in place. The composite hood features a foam insert precut for both fixed-blade and expandable broadheads. Thumb operated quick detach mechanism is easy, fast and quiet.

V100 Limb Tunerz

Improve the accuracy and feel of your bow with Tunerz™. Molded from patented Accu-Flex material, Tunerz are specifically made to remove oscillation and vibration. Limb Tunerz allow you to move Tunerz to different locations to achieve synchronized forward limb movement which produces a quieter and more accurate shot. Compatible with all Horton crossbows – no adhesives required.

V100 Limb Tunerz (4 Pack)

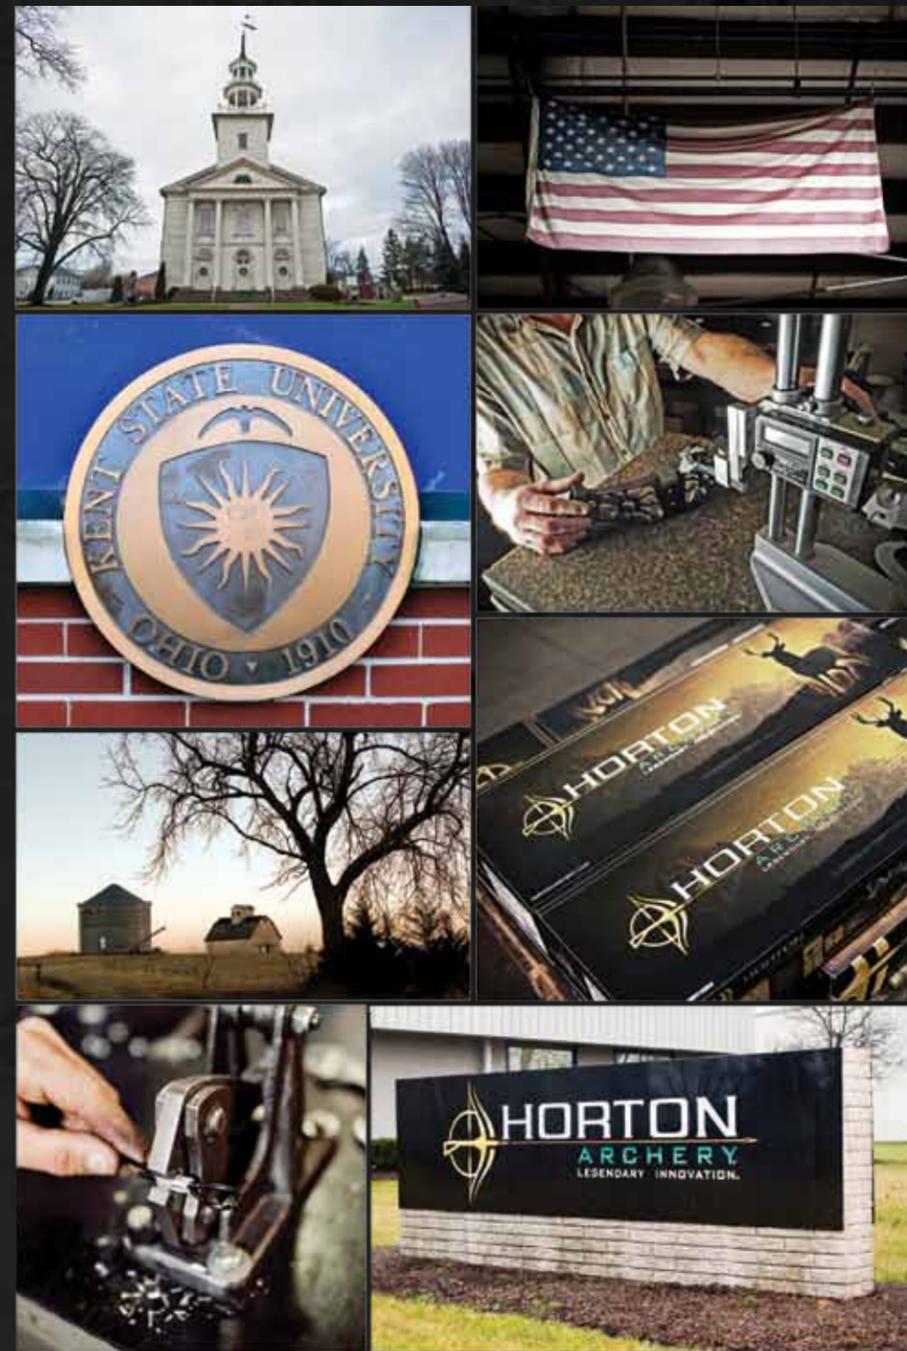

Horton is excited about all of our new products for 2013, as well as continuing our line of other quality, industry-leading crossbows and accessories. Our equipment is built right here in the U.S.A. with American pride and craftsmanship. We strive to build on what Bernard Horton started a half-century ago and that's a product that's rugged, dependable and accurate. The Horton legacy is committed to innovation and excellence.

At Horton, we're humbled to play a part in any hunter's success whether it's a first hunt or one decades down the line. Rules and regulations concerning crossbow use are changing all over the country resulting in more opportunities for hunters of all ages and experience levels. Horton is honored to tag along on a father-son outing or one of a seasoned veteran simply enjoying the outdoor lifestyle on a beautiful autumn day. Whether an animal taken with a Horton crossbow is a record-book buck or a big ol' doe, we say "Congratulations!" as they're all trophies to us.

In addition to providing you with the finest hunting equipment, Horton is committed to customer satisfaction. Each customer is treated like a member of the Horton family and we work hard to make you happy. Whether you have a warranty issue, bow set-up or tuning question, or need answers to any question, our team of dedicated Horton customer service employees are here to help. Our goal is your 100 percent satisfaction. Anything less is unacceptable.

Thank you for choosing Horton. We look forward to hearing from you and best of luck with your hunting adventures this season!
