2013 PSE PRODUCT GUIDE

2013 PSE CROSSBOW LINE **PSE TAC SERIES**

The New PSE TAC Series... a Revolution in Crossbow Design.

A marvel of innovation, only PSE could bring you the TAC Series of crossbows. It all starts by incorporating the incredibly strong X-Tech™ limbs into an extremely compact platform. The ultra-high performance twin-cam design is capable of unprecedented performance. The rail-less design and conventional style release provide the ultimate in accuracy and efficiency.

PSE TAC crossbows convert most AR-15s quickly and easily from a gun to a crossbow. By integrating the trigger, stock and grip into the barrel, the PSE TAC Elite™ crossbow has all the features and performance of the PSE TAC Ordnance™ crossbow in a stand-alone crossbow package. The PSE TAC crossbows are truly a revolution in crossbow engineering and design!

A patent pending "D-loop" Anti-Dry Fire (ADF) mechanism is integrated into the release. The conventional nock, rest and loop allow the PSE TAC crossbow to be loaded before it is at full draw. The PSE TAC crossbow also has the ability to be let down from full draw without being fired. These features combine to create a safer shooting platform.

The cantilevered foregrip delivers the ultimate in accuracy. Three locations of integrated MIL-SPEC 1913 (Picatinny) rails allow for mounting a scope, grip, bipod and a variety of other accessories.

The TAC's innovative "rail-less" design provides superior performance and shot accuracy.

The quick-cocking design and ergonomic high leverage crank allows the TAC crossbow to be loaded and shot in less than 30-seconds.

TAC SERIES

2013 PSE CROSSBOW LINE
TAC ORDNANCE™

**NEW PRODUCT
 2013**

**THE TAC ORDNANCE™
 A NEW BREED OF TAC**

Completely redesigned for 2013, the new PSE TAC Ordnance™ takes the original TAC 15 design to a whole new level and has been designed to be more accurate, more efficient and more durable than ever before. It easily converts most standard AR-15 lowers into the most accurate and powerful crossbow on the market!
