IT ALL ADDS UP

Compare to any other crossbows on the market and see for yourself.

	EXCLUSIVE FEATURE SAFE, SIMPLE DECOCKING	FASTER SPEED	NARROW WIDTH	EASIER DRAW
Stryker	✓	✓	✓	✓
Competitor A	✗			✓
Competitor B	✗	✓	✓	
Competitor C	✗			
Competitor D	✗			✓
	The only crossbow on the market that can be simply and safely decocked.* You don't shoot your firearm to unload it. Why shouldn't it be the same with your crossbow?	Higher speed vs draw poundage. Competitors require a higher draw poundage to achieve speeds equal to Stryker.	Greater maneuverability in tight quarters. Easy to transport to and from the stand, on a quad or backpack.	Lower draw weights make it easy for anyone to load the crossbow effortlessly, but still generate class-leading speeds.

*Excludes Solution models

If you are looking to upgrade your current crossbow or extend your hunting season, Stryker has the solution to your needs. When buying a crossbow, there are key features that all add up to create the ultimate user experience. Stryker is the only brand that when compared head-to-head against the competitors, scores highest across the board in providing those features. You will not find any crossbow that can check off every category and scores as high as Stryker. **It all adds up.**

LIGHTER WEIGHT	BETTER BALANCE	QUICK SCOPE ALIGNMENT	BETTER PRICE
✓	✓	✓	✓
			✓
✓		✓	
Overall lighter weight gives any size or age shooter the ability to get on target faster and stay on target longer.	A bull-pup style stock coupled with a compact overall length creates perfect balance. Eliminates the front end "nose-dive" experienced in other crossbows.	With Stryker, the scope is engineered to provide perfect eye-to-scope alignment when shouldered, for quick target acquisition and superior accuracy.	It all adds up: More features at a price competitors can't touch.

Product Lineup

Dealer Exclusive

At Stryker, we believe the investment in our exclusive dealer network will provide you with the expertise, guidance, and service you deserve when making your first, or next crossbow purchase. As a leader of innovations in the industry, we are changing the way people look at and interact with crossbows. You should have the ability to test and shoot the product before you buy it. We are committed to working with our dealers to provide you this opportunity. When visiting one of our expert dealers you can be confident in your decision. This is just another reason **It All Adds Up** with Stryker and our exclusive dealers.

KATANA 360 **NEW**

Firearm accuracy, uncompromising features

At Stryker, we believe you shouldn't have to compromise when looking at a new crossbow or taking advantage of extending your hunting season. The Katana 360 has all the features and benefits you seek, without having to compromise one feature for another.

Quality, precision, and accuracy are what you expect from a firearm, and we make it a reality in crossbows. The Katana 360 is perfectly balanced, featuring a Bullpup stock on a lighter platform for a best-in-class fit, feel, and balance at 360 feet per second. Superior eye-to-sight alignment puts you on target fast and provides hair-splitting accuracy.

You don't have to shoot your firearm to unload it, right? This should be the same with your crossbow. Unlike our competitors' offerings, Stryker provides a safer, more efficient way to unload the crossbow without the need to shoot it.

FEATURES

- Reverse-draw cam system
- Safe, Simple Decocking
- Guardian™ Anti-Dry-Fire System
- Bullpup Stock

KATANA 385

Performance Defined

The Katana 385 is the ultra mag in crossbows with unmatched speed and power, designed for the largest of game. Built on a feather light aero-rail, coupled with a Bullpup style stock, the Katana dominates the competition in balance and maneuverability. Featuring a 2.5-pound trigger that is tack-driving crisp, you'll be amazed at the rifle-like accuracy of this crossbow.

Integrated into the trigger system is Stryker's Guardian™ Anti-Dry Fire system. This provides an important additional safety. If the shot doesn't present itself, remove the arrow and the crossbow will not fire. The Katana 385 can also be safely decocked without firing or lugging around a decocking arrow. You may not have realized this was an option...Stryker makes it a reality.

OFFSPRING

Ultra Quiet, Deadly Accurate, Absolutely Durable

When using a crossbow, you demand durability, and the Offspring exceeds those demands at 360 FPS. Engineered with supercar performance, melded with your old beater truck durability, this crossbow won't let you down in performance, power, or quality.

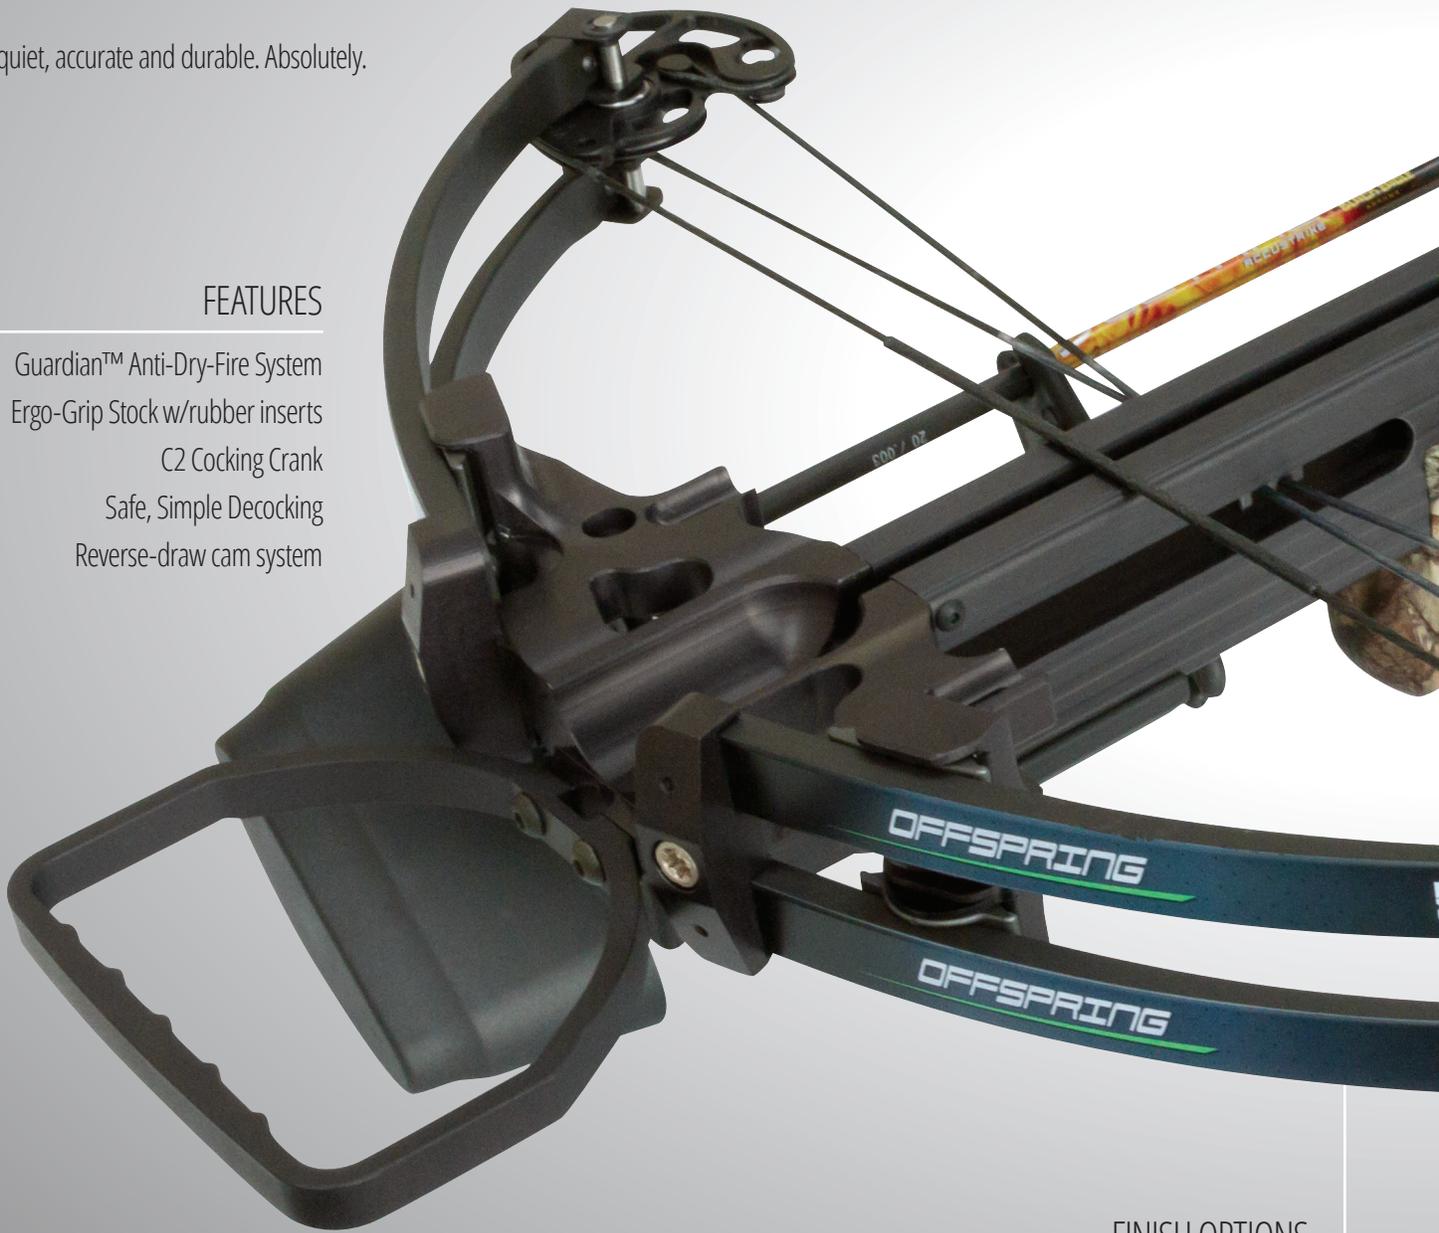

As comfortable as precision-made firearms, the Offspring incorporates an Ergo-Stock with a rifle-like length of pull you are accustomed to. Rubber inserts create a solid grip, even with gloves on the coldest of days, coupled with Stryker's match-grade trigger, giving you the accuracy that only a sniper can rival.

If the shot presents itself, let it rip. Animal down. If it doesn't, not a problem. The Offspring also has the unique ability to be simply and safely decocked, without the need to shoot.

Whisper quiet, accurate and durable. Absolutely.
