## TO OUR CUSTOMERS:

For over 30 years, TenPoint has led the market in crossbow quality, precision, & innovation. Hunting isn't just our business – it's our passion. Every member of our leadership/management team, from ownership to engineering to production, lives for those moments in the treestand, & understands accuracy matters most when it's time to pull the trigger.

In 2023, we tasked our engineering department with making "crossbow accuracy" its top initiative. Through hundreds of hours & tens of thousands of arrows in testing, we've uncovered critical insights, culminating in the launch of the Ultra Series Crossbows & ACU-X™ Arrows & Nocks.

Our Ultra Series crossbows are the most accurate, repeatable crossbows we've ever manufactured. Every component is designed to achieve sniper-like accuracy with category-leading reliability, featuring precision-engineered innovations that deliver 70% tighter groups at 100-yards.

**NEW** Larger 8MM Axles & **NEW** Wider X-Wide™ Limbs create a more stable, repeatable, & reliable shooting platform, while the ACU-X Arrow features spine-indexing technology & ACU-X Snap-On Nock for precision long-range accuracy while preserving string center serving life.

Our ACU-X Arrow features platform-specific spine-indexing & combines with the ACU-X Snap-On Nock to create the most accurate & consistent arrow we have ever engineered.

Our 2026 collection delivers accuracy like you've never seen before. Visit your local TenPoint dealer & experience the difference—because accuracy you can measure is accuracy you can trust.

MOGADORE, OHIO

**AMERICAN-BUILT. PROVEN MORE ACCURATE.**  
During independent third-party testing in 2025, the American-Built Wicked Ridge Invader M1 was tested to be 25% more accurate than the average of the 4 major Imported crossbow brands, & shot groups that were 35% smaller than the worst performing Imported crossbow.

(\*Results from <https://www.outdoorlife.com/gear/best-crossbows/>)

**GORDON GLASS™ DOUBLE LAMINATED LIMBS**  
Crossbow limbs can make or literally break the crossbow. Mass-produced imported crossbows under \$500 use inferior imported limbs that come with a low cost, but unfortunately a high failure rate. All Wicked Ridge crossbows include Gordon Glass limbs—the finest limbs money can buy. We all save those vacation days with plans to be out in the field...don't let your limbs leave you "out on a limb" this fall!

# NOCKS

## NEW ACU-X SNAP-ON NOCK

The ACU-X Snap-On Nock features our innovative Snap-On design, providing an unmistakable audible "click" when properly engaged with the bowstring, eliminating lateral nock travel during the shot cycle for precision long-range accuracy, while preserving string center serving life. The ACU-X Snap-On Nock provides secure string fit & the most consistent design for rail-less crossbows.

**NOTE:** The ACU-X Snap-On Nock is required for use with TenPoint Rail-Less Crossbows. Failure to do so will void the manufacturer's warranty.

## ALPHA-NOCK HP

TenPoint's Alpha-Nock HP & Alpha Nock HPX feature a deep bowstring groove, a large smooth radius base, & elongated ears. The string on wraps tightly around the center of the nock resulting in straight nock travel & precision down-range accuracy, while minimizing string serving wear.

The nock's deep channel design increases the string-to-nock engagement by 28% & "holds" the bowstring in place during the shot which prevents "shoot-over" or "shoot-under".

**NOTE:** The Alpha-Nock HP is required for use with TenPoint & Wicked Ridge Railed Crossbows. Failure to do so will void the manufacturer's warranty.

# LIGHTED NOCKS

## NEW ACU-X LIGHTED SNAP-ON NOCK & ALPHA-BLAZE LIGHTED NOCK

TenPoint's ACU-X Lighted Snap-On Nock & Alpha-Blaze Lighted Nocks contain a one-piece Nock/LED unit that is indexed with the vanes & press fits into the arrow's Aluminum Bushing. Upon firing the crossbow, the bow string pushes the nock fully into the bushing & activates the LED light.

Deactivate the easy on/off lighted nock by pulling the nock straight out until the light turns off. The LED light system lasts for approximately 24 hours when activated. Use of the Bednar Perfect Puller 2.0 makes lighted nock deactivation extremely easy.

The lighted nock fits into TenPoint & Wicked Ridge arrows equipped with an HP Aluminum Bushing (sold separately).

**BE SURE THE NOCK'S RAISED LINE INDEXING FEATURE IS PROPERLY ALIGNED WITH THE ODD COLORED VANE ON YOUR ARROW.**
